

GBV CASE IN NCR

Based on the counselling sessions of a 45 years old woman with the CHR-GEWHRC, she has an abusive relationship with her common law spouse. According to the victim, her common law partner is a drug addict and would have strangers with him in the house during the night. Worse, he would have also different women in the house. She further stated that even her daughter would witness the drug sessions including her common law spouse's sexual activities. The victim also narrated that she was subjected to physical abuse from her common law spouse.

The victim is currently provided with shelter support by the Commission.
